Data Analytics  
Information management  
Mobile solutions

Alpharithmetic Technologies was established in 2007 to provide expert solutions in Information Management space.

We specialize in delivering complex data management and business analytics solutions.

Headquartered in Singapore with offices in UK and a state of the art development center in India, we deliver assured ROI to our customers on their IT investments.

Our mission is to help organizations maximize the value of their data assets by transforming data into intelligence and insight.

We bring to you several years of collective industry experience to provide best of breed ERP solutions, data integration, data consolidation, analytics and mobile solutions to suit your needs.

### Customer speaks....

"I am Happy with the outcomes of the ERP implementation at our organisation. I felt the team was proactive throughout the duration of the project and maintained consistent levels of intensity to ensure the major milestones were met as far as possible.

The team took the necessary efforts to understand the nature and complexities of our business and ensured this was reflected in process and procedure design.

Given the relative system related inexperience of our staff, I was pleased to see that additional efforts were undertaken by the Alpharithmetic team to train the users prior to and during the "go live" phase. Above all, I was impressed by the flexibility and dexterity of the Alpharithmetic team in accommodating our request and resolving all technical and other issues."

Navneet Raman  
Director,  
Nucleus Satellite Communication Limited.
